Animal Hospital**

Important Notice Regarding Pet Medications

In recent years there have been a growing number of online and regular pharmacies offering pet medications and preventatives.

At All Creatures Small, our first and most important concern is your pet's health and well being. We carefully choose the medications we offer to our patients, making sure they are safe, effective, and fully guaranteed by the manufacturers. Unfortunately, this cannot be said about some of the other pharmacies where lower cost is the driving force.

When you ask our doctors to prescribe a pet medication to be purchased elsewhere, please be aware that we, or the drug companies, cannot guarantee that product should a recall be made, adverse reactions occur or break in efficacy is found. **The pet drug companies may only guarantee medications purchased through a licensed veterinarian.** Should you still decide to purchase your pet's medication elsewhere, we ask you to sign the waiver below stating you are aware of this information.

At all times, please feel free to discuss any question or concerns with us.

Respectfully,

All Creatures Small Animal Hospital

I, _____, request that All Creatures Small give prescription for a veterinary medication, including parasite prevention, to an online company or human pharmacy for my pet _____. I understand that most pharmaceutical companies sell only to licensed veterinarians and this may void any guarantees. Therefore, All Creatures Small will not be held responsible for any adverse reaction or lack of effectiveness from any veterinary product purchased outside of our clinic. Also, annual wellness exams and annual heartworm testing are required for prescriptions.
